

### Calculating CRIS-CAT scores

To access the Extent, Perceived and Satisfaction subscale scores complete the following steps:

- 1) After filling surveys go to "C:\Program Files\CRIS CAT 1.16" and open the 'db1.mdb' access file.
- 2) From 'Create' tab choose 'Query Design'. Close dialog box that opens.
- 3) On top left change view to 'SQL View'
- 4) Clear the window of code (delete 'select')
- 5) Copy and paste the code below into query1 window:  
*SELECT demo.id, demo.sessionID, demo.visits, [Frequency Score].[Extent Score], [Limitations Score].[Perceived SCore], [Satisfaction Score].[Satisfaction Score]  
FROM ((demo LEFT JOIN [Satisfaction Score] ON demo.sessionID = [Satisfaction Score].sessionid)  
LEFT JOIN [Frequency Score] ON demo.sessionID = [Frequency Score].sessionid) LEFT JOIN  
[Limitations Score] ON demo.sessionID = [Limitations Score].sessionid  
ORDER BY demo.id;*
- 6) Click run. A window will appear displaying the subject number, visit, and the subscale scores.
- 7) Click anywhere in the window and then press Ctrl+A to highlight the entire table.
- 8) Right click on the highlighted area and choose copy
- 9) Open Excel, right click on any cell and choose paste.
- 10) Use Cntl+S to save the resulting excel file with whatever name and location you choose.
